DYNAMIC ASPECTS OF STRUCTURAL CHANGE IN LIQUIDS AND GLASSES[a]

Editors and Conference Organizers
C. AUSTEN ANGELL and MARTIN GOLDSTEIN

CONTENTS

Preface. *By* C. AUSTEN ANGELL and MARTIN GOLDSTEIN ix

Part I. Vitrification and Devitrification: The Ins and Outs of It

Tiling, Prime Numbers, and the Glass Transition. *By* FRANK H. STILLINGER and THOMAS A. WEBER 1

Slipping into the Glassy State via the Crystalline Solid State. *By* W. L. JOHNSON 13

Nucleation of Crystals from the Melt. *By* DAVID W. OXTOBY 26

Micromechanisms and Kinetics of Crystallization below the Glass Transition Temperature. *By* UWE KÖSTER 39

Part II. Structural Aspects: Neutron Scattering and Electron Microscope Studies of Almost Glassy Crystals and Almost Crystalline Glasses

How Disordered Can a Crystallized Glass Be? *By* A. F. WRIGHT, A. N. FITCH, and B. E. F. FENDER 54

How Ordered Can a Glass Be? *By* P. H. GASKELL 66

Pressure Melting below the Glass Transition: A New Way of Making Amorphous Solids. *By* EDWARD WHALLEY, OSAMU MISHIMA, Y. PAUL HANDA, and D. D. KLUG 81

Part III. Relaxation

Molecular Dynamics Computer Simulations of the Supercooled Lennard–Jones Liquid. *By* MARCIA H. GRABOW and HANS C. ANDERSEN 96

Specific Heat and Ultrasonics as Dynamic Probes of the Glass Transition. *By* NORMAN O. BIRGE, YOON H. JEONG, and SIDNEY R. NAGEL 101

Parallels and Contrasts between Glass and Spin Glass. *By* R. G. PALMER 109

Sequential Freezing of Quadrupolar and Dipolar Order in $(KBr)_{1-x}(KCN)_x$ Glasses. *By* A. LOIDL and K. KNORR 121

[a]This volume is the result of a conference entitled Dynamic Aspects of Structural Change in Liquids and Glasses, which was held in New York, New York on December 1–3, 1985 by the New York Academy of Sciences.

Glassy Crystals: Low-frequency and Low-temperature Properties. *By* JAMES P. SETHNA 130

Three Coupled Relations for Relaxations in Complex Systems. *By* K. L. NGAI, R. W. RENDELL, A. K. RAJAGOPAL, and S. TEITLER 150

Linear and Nonlinear Experiments for a Spin Model with Cooperative Dynamics. *By* GLENN H. FREDRICKSON 185

Elastic Properties of Network Glasses. *By* M. F. THORPE 206

Part IV. Relaxation toward What?

Hard Spheres and Instabilities. *By* ROBIN J. SPEEDY 214

Glass Transitions in Hard-sphere and Lennard–Jones Systems. *By* U. BENGTZELIUS and A. SJÖLANDER 229

The Kauzmann Paradox, Metastable Liquids, and Ideal Glasses: A Summary. *By* C. A. ANGELL, D. R. MACFARLANE, and M. OGUNI 241

Thermodynamic Aspects of Glassy Crystals: Approaching the Equilibrium Glass. *By* H. SUGA 248

Part V. New Perspectives on Structure

Icosahedral Order in Glassy Metals. *By* DAVID R. NELSON 264

Realistic Theories of the Origin and Molecular Structure of Glass. *By* J. C. PHILLIPS 271

Panel Discussion 287

Poster Papers

The Glass Transition in the Hard-sphere Fluid. *By* MOORAD ALEXANIAN and SUBIR K. BOSE 297

Barrier Distributions and Defect Migration in Glasses. *By* JOHN T. BENDLER and MICHAEL F. SHLESINGER 300

Behavior of Supercooled and Liquid Phase $LiCl \cdot nH_2O$: Thermal and Structural Aspects. *By* A. ELARBY-AOUIZERAT, J. DUPUY, J. M. LÉTOFFÉ, P. CLAUDY, and P. CHIEUX 302

Vogel–Fulcher Time Scale for Glass Freezing: A New Derivation on the Principle of Optimal Network Kinetics. *By* ULF LARSEN 304

Anelastic and Plastic Response of Polymers. *By* D. G. LEGRAND, W. V. OLSZEWSKI, and J. T. BENDLER 307

Structural Relaxation Behavior of Iron-based Metallic Glasses upon Annealing. *By* I. MAJEWSKA-GLABUS 311

Nonexponential Relaxation of Viscous Supercooled Liquids. *By* M. CRISTINA MARCHETTI 313

Density Wave Theory of the Liquid-Solid Interface. *By* U. MOHANTY and G. JONES 316

Energetics and Variations in Structure in Framework Aluminosilicate Glasses, Melts, and Crystals. *By* ALEXANDRA NAVROTSKY 318

Empirical Requirements on Models of Relaxation. *By* A. K. RAJAGOPAL, R. W. RENDELL, K. L. NGAI, and S. TEITLER 321

Pressure Variation of the Glass Transition Temperature in Atactic Polystyrene. *By* J. R. STEVENS, R. W. CROAKLEY, K. W. CHAU, and J. L. HUNT 324

Existence of "Critical" Frequencies in the Dielectric Loss Properties of Glasses. *By* U. STROM 328

Glass Transition Kinetics in Polystyrene Using the Pressure-jump Volume Relaxation Method. *By* J. J. TRIBONE, J. M. O'REILLY, and J. GREENER 330
